SUMMARY

Project manager with management experience and a technical education. Knowledge and experience in Agile frameworks and various project management life-cycles. In addition to project management skills in the utility industry, years of experience with full-cycle software sales and implementation. Experience working with startups and large companies, with the small business mentality of doing whatever needs to get the job done with large company acumen. Excited to combine technical training, management experience, and project management skills to effect change in meaningful projects.

CERTIFICATION

Certified Associate in Project Management (CAPM) : Project Management Institute,
Newtown Square, PA

SKILLS

Agile Methodologies & Frameworks: Agile Scrum framework, story point estimation, scrum ceremonies, sprint backlog management, sprint retrospectives

Business and Organizational Strategy: Resource planning, Procurement (RFP and RFQ creation and responses), Communication matrixes, project scheduling

Communication: B2B communication, social matching utilization, servant leaders skills, active listener, cognizant of best communication tools to use to get points across.

EXAMPLE PROJECT WORK

No Name Street Project for Eversource Energy

- Tasked by Eversource Energy Transmission Manager to manage a project of populating missing street names on Geographic Information System online mapping solution for all streets outside of territory in New England.
- Worked with Transmission management, IT, Eversource Clearing House, contractors, and municipalities to collect official street data to populate into the system.
- Project was designed to help inspection contractors and maintenance teams find Eversource transmission lines and structures outside of territory to inspect and repair. Before this project the teams would use Google maps and unverified third party websites.

RELEVANT EXPERIENCE

Project Manager

PenangBenny Consulting

November 2018 – Present

Rocky Hill, CT

I work with the company's utility clients to manage various Geographic Information System (GIS) data projects. The GIS data is used for different projects enterprise wide for

Engineering, IT, Transmission, Vegetation Management, Real Estate, and other groups to develop plans for operations, maintenance and capital projects. I also manage and work with legal teams and forensic accountants for mediations and arbitrations for conflict resolution.

Key Accomplishments:

- Manage a team of two GIS Analysts.
- Have successfully closed enterprise-wide project for publicly traded utility company.
- Recovered funds from mediation sessions for conflict resolution.

ADDITIONAL EXPERIENCE

Sales Consultant

March 2015 – September 2018

APP Technologies, LLC.

Norwalk, CT

- Managed the entire sales cycle for a small software company from prospecting to closing sales.
- Account Manager for new and existing clients for first-line support and contract renewal.
- Implementation experience of new clients working with the software development team to customize new implementations of the SaaS product.
- Regularly performed customized two day on-site training sessions for new clients.

EDUCATION

Bachelor of Arts, Communication, Minor Music: University of Connecticut Storrs, Connecticut 2014

Technology Project Management Certificate: Columbia University New York, New York 2021

An intensive 18-week long boot camp dedicated to Technical Project Management. Skills learned consist of agile methodologies and frameworks, waterfall projects and tools and use with resource planning and team communication. Developed projects using Smartsheet, G Suite, Jira, Gantt charts and Work Breakdown Structure (WBS). Additional skills in software development including budgeting, mapping, modeling, and testing.
